BE Labs, makers of CBD LUXE, is a nutraceutical company with a passion for using plant-based science to improve health and wellness. At BE Labs, the science of plants is our abiding passion, and we use that passion to build our commitment to our customers' health and wellness the world over.

As a health and wellness lifestyle brand leader we have been on the forefront of hemp-based cannabinoid science. We are a dynamic and innovative product formulation company with professional, compliant manufacturing capabilities. We take great pride in our cGMP certified operations to our standards in great customer service, fulfillment, and a ceaseless commitment to excellence.

About CBD LUXE

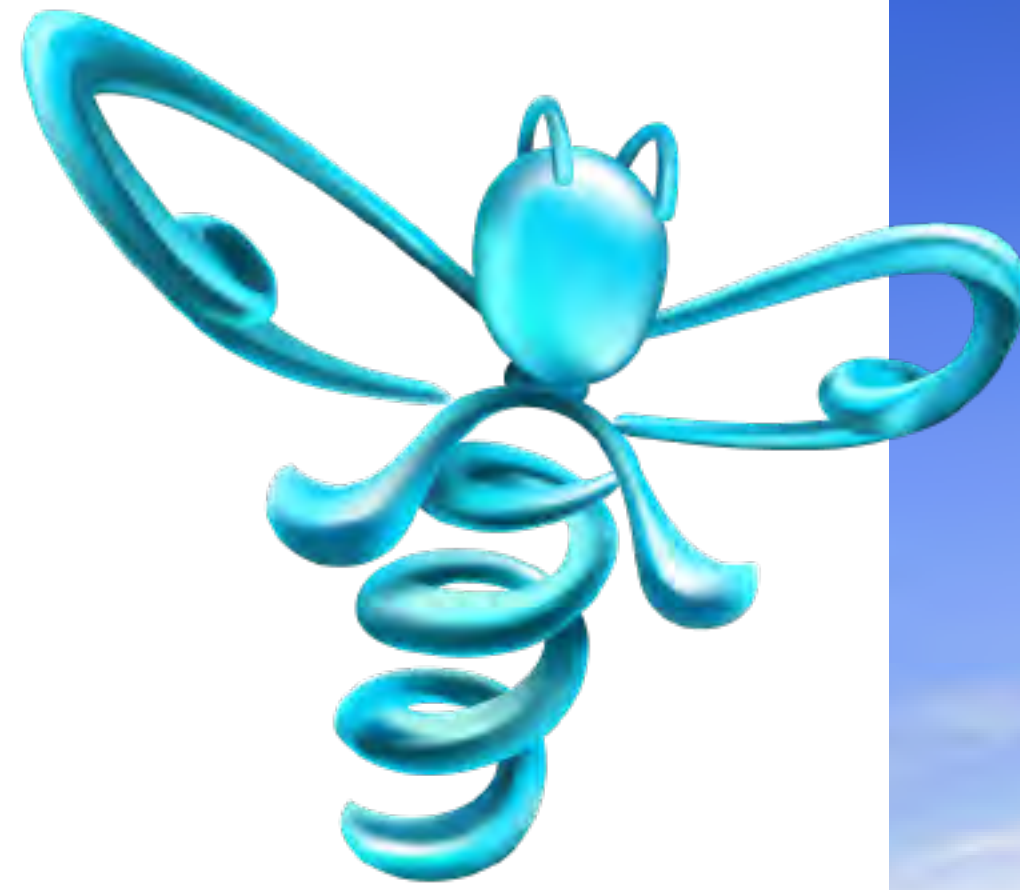

CBD LUXE

BE Labs flagship brand, CBD LUXE, was born from the need to create quality, efficacious, cannabinoid-centric products in an industry fighting for legitimacy and legal acceptance. BE Labs founder, William A. Spilo, knows all too well the struggle to find natural health and wellness solutions in a world dominated by big pharma.

Among many other pursuits and passions, including botany, real estate development, and private equity, Will was first a professional snowboarder and eventually a heliski-guide leading some of the world's greatest athletes to the height of their athletic careers. Will's passion for gravity sports eventually led to a myriad of serious injuries. The operations and pain meds that followed soon became a cycle from which Will needed to break free.

His academic background and experience in botany led Will to discover the healing properties of cannabis and hemp, and how the plant's different compounds, or cannabinoids, can be formulated in a way that allows prescriptive product development to address specific ailments and health needs.

About CBD LUXE

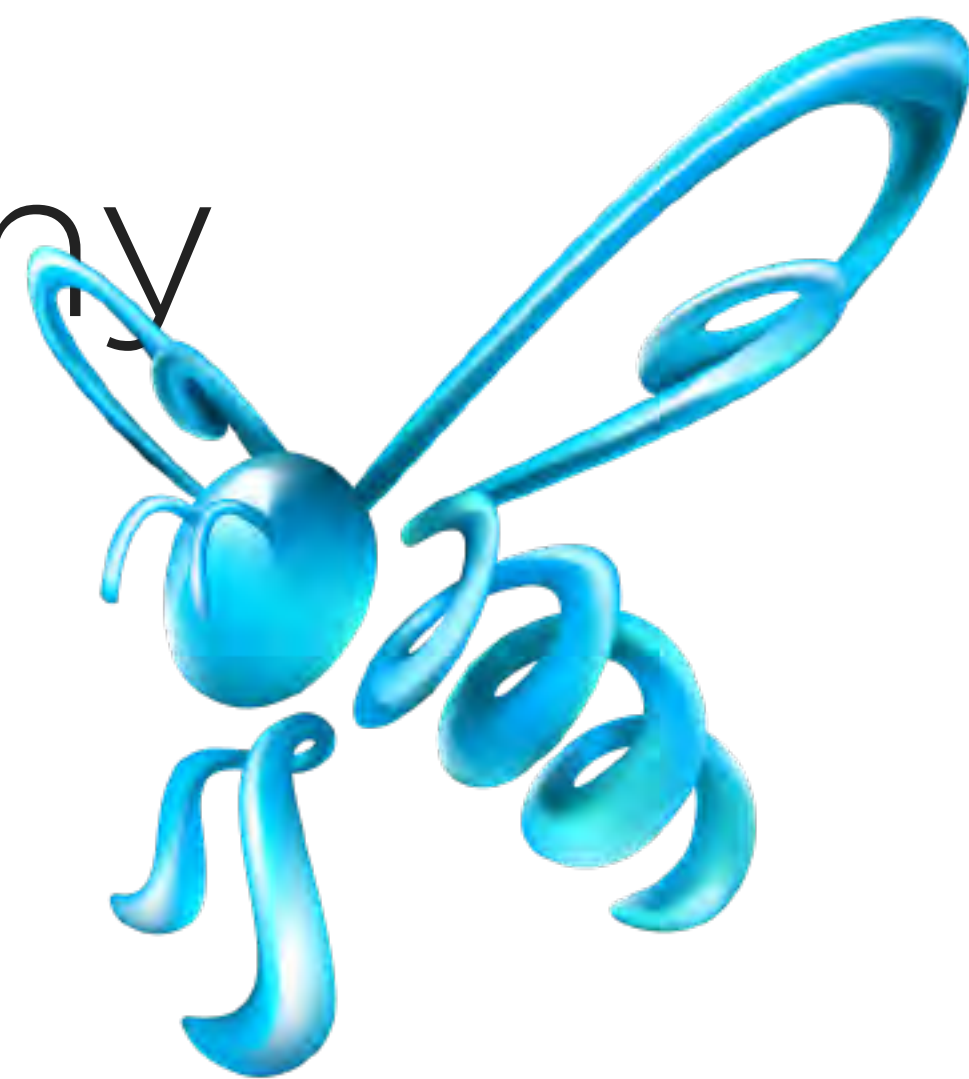

At that time, William was compelled to solve his own problems with chronic pain. When his original formulations worked wonders for himself and his peers, Will began to share them with others and CBD LUXE was born. Will's drive to create and bring to market ultra-high-quality hemp-derived CBD products is now shared by a growing team of dedicated professionals and appreciated by a growing legion of CBD fans around the country and world.

CBD LUXE

Company Values.

How we conduct ourselves and our business is the core focus of growing our healthy enterprise. We seek to be highly informative, honest, and transparent in our dealings with our team members, suppliers, partners, investors, and customers.

We are a highly innovative company committed to maintaining rigorous pharmacological standards to deliver the highest quality CBD products on the market. We care deeply about our customers and our ability to help them manage their anxiety, pain, and other ailments. This core

concern drives our research and development and motivates us to make the purest, safest, most efficacious products available anywhere in the world.

By adhering to the triple bottom line (People, Planet, Profit) framework, we are building for the future today. Our team is made up of dedicated professionals who support each other in the workplace and treat our vendors and customers with kindness and respect. Conscious behaviors and healing plants go well together.

Join us on this
journey to **plant-based**
wellbeing.

CBD LUXE Tincture Spray

.....

We combine USDA Certified Organic, Non-GMO, Micro Fractionated Coconut Oil with Pharma Grade 99.9% pure CBD isolate to create a highly efficacious, potent and absorbent oral spray tincture.

Used orally our sprays provide maximum, rapid absorption through the mouth's mucous membrane allowing for minimal loss in the gastrointestinal system. Used Topically it provides a soothing, even, no-mess CBD spray for a myriad of epidermal ailments.

CBD LUXE Topical Sprays allow for an even, light coating of CBD and Coconut Oil where the application of heavier creams and salves may be too abrasive to sensitive affected areas.

Contains 1000mg CBD.
All ingredients are USDA Certified Organic, Non-GMO.

CBD LUXE Herbal Infused Topical Salve

CBD LUXE has embraced the ancient art of Chinese Herbal Medicine and combined it with the efficacious Phyto Cannabinoids of the Hemp Plant. Dominant in CBD and rich in other hemp based cannabinoids, CBD LUXE utilizes a proprietary blend of Chinese Herbs and Hemp Oil to create one of the most potent and effective therapeutic topicals available. We created a warming therapy (Be Fire) formulation for longer term afflictions and treatment.

A cooling therapy (Be Ice) formulation for more acute afflictions both aimed at treating the problem on contact and long term. With a convenient, easy open, leak proof, PET, double walled salve jar one can administer as much or as little topical salve as they wish to any effected area. Formulated with a blend of hyperactive transdermal oils and herbs to penetrate the skins surface with maximum potency. Once again, CBD LUXE continues to deliver the most efficacious, easily used CBD products available.

CBD LUXE Hand Sanitizer

Keeping your hands free of microbes and contagions is the first step in preventing yourself from contracting dangerous viruses, infections, and other health ailments.

With the COVID-19 pandemic of 2020 as a harsh reminder of the importance of maintaining clean hands, it is not always possible to access proper soap and water throughout the day or directly after making contact with any potentially infected surfaces (including other people's hands).

The old standard of 62% ethyl alcohol is now thought to be inadequate in killing of contagions associated with the spread of COVID-19 and other health ailments.

The WHO and CDC now believe that 80% ethyl alcohol is required to stop the spread of germs and contagions associated with the COVID-19 virus.

CBD LUXE is upping the ante and providing our rich hand sanitizer with 80% Ethyl alcohol, designed to kill 99.9% of all germs and contagions on contact as well as adding Hydrogen Peroxide for additional anti septic/cleansing properties.

BELABS

CBD LUXE Hand Sanitizer

INGREDIENTS

• • • • •

Active Ingredients:

Ethyl Alcohol (80%)

Inactive Ingredients:

Organic Aloe Leaf Juice, Hydrogen Peroxide, Glycerin, Organic White Willow Bark Extract, Tea Tree Leaf Oil, Polysorbate 20, Organic Alcohol, Phenoxyethanol, Tetrasodium Glutamate Diacetate, 50 mg - 200 mg CBD.

For external use only: hands.

Luxe Sani Hand Sanitizer

NO CBD

The WHO and CDC now believe that 80% ethyl alcohol is required to stop the spread of germs and contagions associated with the COVID-19 virus.

That is why we at BE LABS, makers of CBD LUXE and LUXE SANI, have made our latest natural hand sanitizer with 80% ethyl alcohol to help stop the spread of COVID-19. To ensure our formula is completely effective and safe, we added additional antiseptic cleansing agents, such as hydrogen peroxide and antibacterial essential oils, including organic tea tree leaf oil, to create an added line of defense for you and your family.

Due to the drying nature of alcohol, we added organic aloe vera to help soothe your skin and prevent dryness from the frequent necessary use of hand sanitizer in these trying times.

We also added organic white willow bark as an anti-inflammatory agent to heal in any agitation at the skin surface. White willow bark has been used since around 400 BC to reduce fever and inflammation by chewing on it. Now we are able to harness these natural properties effectively in our latest hand sanitizer

We at BE LABS are committed to keeping your hands germ free and feeling smooth when it matters most.
