About Esta Crompton

Esta Crompton, the CEO, founder, and mind behind Estala Skincare spent her life envying and appreciating the beauty industry but didn't realize how important a role it would play in her life until her world was changed forever. On March 6, 1987, Esta fell victim to a devastating, and almost fatal, drunk driving accident, which left her face unrecognizable and seemingly irreparable.

For more than two decades Esta spent her days in and out of surgery, to no avail, until finally meeting one surgeon who changed her life, mended the damages done to her face, and introduced her to the world of reparative and restorative skincare.

Today, Estala Skin Care is formulated with some of the markets most effective, gentle, and advantageous ingredients, with proven results, as Esta herself is the spokesmodel for its miraculous effects.
