SOURCE CBD FOUNDER

Source CBD is a family owned business that began when Ian Pedersen started working with a young girl with Anencephaly, a rare condition that caused multiple seizures every day. The breakthrough formulation resulted in a near immediate reduction in her seizure activity that led to what is now an international CBD company called Source CBD.

Ian is a leading CBD medical hemp researcher in the US and has worked for over 20 years within the cannabis space to uncover the medical benefits of hemp derived CBD.

Ian's background extends to launching state licensed medical cannabis facilities as well as being the Founder and Director of Source CBD who has been widely recognized as the pioneer in CBD research for humans and pets as well as in treating rare and exotic animals at nationally recognized wildlife refuges and parks.
