Palette Market was launched in early 2019 to connect people with high quality and carefully curated hemp products and skincare solutions with a focus on common sense wellness routines that lead to healthier, more beautiful lives. We are an Atlanta based company.

We are also the only company in the world that blends art with hemp. We believe there is a common thread between the healing properties of wellness products centered around hemp, and making your walls a little more colorful and enjoyable. Each month we interview artists from around the world and add to our creative platform to provide an outlet for hand selected artists to showcase their work to our community.

Every customer who purchases products from Palette will receive a unique art print with each order, from the Palette Featured Artist of the Month. As we grow, we will continue to research new product bundles and experiences in our quest to provide “Mindful Maintenance” in your daily routine.

Palette is also a platform for artists to share and sell art prints. We are dedicated to illustrators, photographers, and designers, helping them surface their work to the Palette community. Our global artists and art prints have been hand selected to support a lifestyle of mindful maintenance and wellbeing. When creating a composition, an artist uses an array of colors and tones and mixes those ingredients to create art. We want to share the stories of unique artists we meet along the way. With every product order over \$50, our customers will also receive an Artist of the Month Interview Card and 5x7 Print of the Month. As we grow, the featured artists and art prints will expand and new prints will be added daily to the marketplace.
