VITAMIN C

Organic Vitamin C comes from Organic Amla fruit, also known as Indian gooseberries, which are said to be natural immune boosters as they contain a powerful cocktail of vitamin C and A, polyphenols, alkaloids, and flavonoids such as quercetin and kaempferol. According to a study published in the International Journal of Pharmaceutics, Amla has potent antibacterial and anti-inflammatory properties. Amla juice, in Ayurveda, is often used to increase the white blood cells in the body, which are the main line of defense for the immune system. White blood cells attack and eliminate foreign toxins and substances into the bloodstream throughout the body.

VITAMIN D3

Vitamin D deficiency is a problem for both vegans and omnivores alike.

Recent research shows that around 77% of Americans are vitamin D deficient, particularly in the winter. Vegans face an even greater challenge because the only good food sources of vitamin D are animal products...until now!

Organic Vegan Vitamin D3 (VegD3®) is the only pure plant-based Vitamin D3 that can be used as a 1:1 replacement for animal sourced D3. From a sustainable, organic algae source, it offers superior purity and quality to lanolin D3. The fully traceable supply chain is pesticide, protein and heavy metal compliant. It is Vegan Society approved and is the only 100% pure crystal Cholecalciferol (Vitamin D3) for Vegans in organic form.
