

Remedy Processors

Custom Formulators and Suppliers of Premium CBD Derived Extracts
THC-Free and Complaint Full Spectrum

About us

The brainchild of top chemical engineers and cannabis manufacturers - Remedy targets fundamental issues in the hemp industry and solves them. Founded in December 2018, we are a Research & Development driven laboratory, focused on the separation and isolation of pure cannabinoids. Our proprietary technologies allow us to take cannabis manufacturing to the next level by providing unparalleled quality and effectiveness for businesses and consumers. Our belief is that better purity and higher potency lead to products that work.

We source our extracts from the best local, organically-grown farms. Our cutting edge approach, and ability to adjust cannabinoid potency profiles in real-time, allows us to create luxury products for our clients who sell their products in stores like Sephora, Saks Fifth Avenue, Nordstrom and others.

Exceptional

- Efficacy
- Cannabinoid Potency
